

CASE STUDY

HOLMEN
HIGH SCHOOL

HOLMEN, WISCONSIN

In 2018, Holmen School District voters approved \$23.5 million via referendum to expand and remodel Holmen High School to meet the demands of the growing community.

The ambitious project spread over 72,000 ft² would include the addition of new classrooms, cafeteria, kitchen, gymnasium, weight room, and performing arts center.

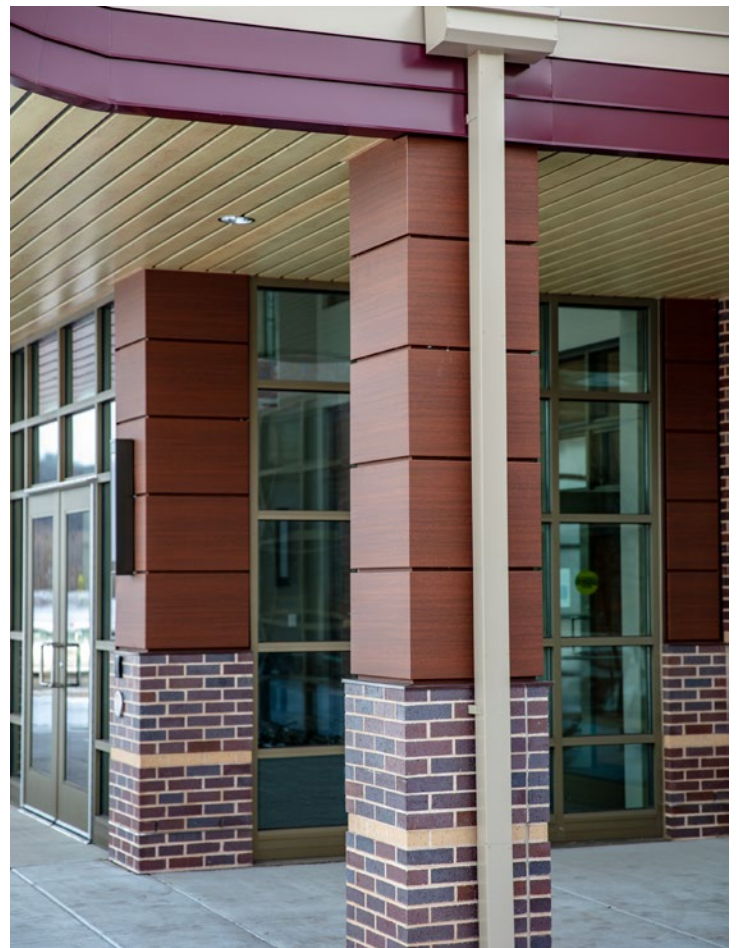

Designed to provide a better learning environment for the growing student body and additional facilities that supported the school's excellent program of extracurricular activities, the project would create inspiring and inclusive spaces that benefited the Holmen community.

Castle Metal Products fabricated and installed 23,789 square feet of AS2000 in a Design Line™ Rusted Metal finish using a rainscreen application. AS2000, part of the innovative sheet portfolio from Arconic Architectural Products, is a 2mm pre-painted aluminum sheet that delivers supreme flatness and long-term durability to building facades.

The choice of the Design Line™ Rusted Metal in a Duragloss® 5000 finish grounded the buildings in the beautiful Wisconsin landscape, creating a modern but appropriate aesthetic across the development. The addition of the Duragloss® 5000 paint system provides excellent UV resistance and high durability.

The school now offers flagship features to its students and the local community, supporting academic, sporting, creative and social progress that encourages participation in the classroom, gymnasium, and theatre.

The Athletic Complex and Fine Arts Centre are two standout features of an exceptional development. In the words of Dr. Kris Mueller, the district administrator for Holmen School District, "It's just amazing what we were able to do, and just so proud of everyone, who not only supported us from the beginning but helped us along with the planning and the design and making this happen."

ARCHITECT	HSR Associates Inc
GENERAL CONTRACTOR	Fowler & Hammer
FABRICATOR	Castle Metal Products
PRODUCT	23,789 square feet of AAP's AS2000
COLOR	Design Line™ - Rusted Metal
APPLICATION	Rainscreen
