

HALOGEN-FREE COMPLIANCE STATEMENT

We declare that in the manufacturing of the aluminium and aluminium alloy products produced by **Arconic-Kőfém Mill Products Hungary Kft.** are **halogen-free**, meaning they do not contain chlorine, bromine, fluorine, iodine, or other halogen elements above the defined regulatory limits.

The term “halogen-free” is defined by international standards such as **IEC 61249-2-21**, which specifies that materials must contain:

- Less than **900 ppm of chlorine**
- Less than **900 ppm of bromine**
- Less than **1,500 ppm of total halogens**

This compliance aligns with global environmental and safety regulations, including:

- The **EU RoHS Directive** (Restriction of Hazardous Substances), which restricts hazardous materials in electrical and electronic equipment.
- The **REACH Regulation** (Registration, Evaluation, Authorization and Restriction of Chemicals), which governs the use of chemicals in products.
- Industry-specific standards such as **IEC guidelines** for halogen-free materials in electronics and automotive applications.

By adhering to these requirements, we ensure that our products meet international environmental and safety standards, reducing risks associated with toxic emissions and improving sustainability.

This declaration is based on internal quality controls.
